

Valentín Doroszuk

Full-Stack Developer

valendoro55@gmail.com
CABA, Buenos Aires · Argentina
linkedin.com/in/valentin-doroszuk-visillac

PROFILE

I design and build complete custom systems, from the idea to a working product. When it helps, I add automation and artificial intelligence so repetitive work takes care of itself. I work for clients and on my own products.

EXPERIENCE

Founder & Full-Stack Developer

2022 – Present

Dorvia · Buenos Aires (Remote)

- **Desesplast** — a system that processes the invoices exported by their management software (Bejerman), sends personalized emails, keeps current accounts and employee time tracking, and organizes everything in Google Drive.
- **E-COMEX** — a platform that classifies tariff codes (NCM) with AI and computes the total cost of importing into Argentina.
- Sites and systems for various clients: online stores, internal systems, invoicing automation and AI WhatsApp assistants.

Web Developer

2024 – 2025

Basque Country Film School (ECPV) · Bilbao (Remote)

- **BegiraDB** — the audiovisual-sector platform connecting professionals and talent with production companies and projects. Bilingual in Spanish and Basque, built to be accessible.

SELECTED PROJECTS

E-COMEX	AI import-cost calculator — classifies the tariff code and computes the full landed cost into Argentina.
Meetzy	Embeddable AI assistant for websites, with voice, an animated avatar and subscriptions.
BegiraDB	Basque Country audiovisual-sector platform (ES / Basque).
CuatroCero Gestión	Live futsal-club management with a statistics dashboard.
Souverain	Premium online store with card or WhatsApp checkout.
